Pre-Surgery

Most procedures require fasting for 6-8 hours but you may drink water until 2 hours before surgery. Do follow your doctor's advice regarding your regular medication.

Post-Surgery

After the surgery, our nurses will monitor and assist you until you are ready to be discharged. Please ensure that you have someone to accompany you home.

Home Recovery

- Avoid driving, cycling, operating machinery, signing legal documents or making important personal or business decisions in the first 24 hours.
- Rest and take medications as instructed and avoid alcohol.
- Contact the clinic if you feel pain or discomfort, or if you have unusual bleeding or an allergic reaction to the medications.
